Korisipati Vishnu Vardhan

Software Developer | AI Agents & Backend Systems

Hyderabad, India • +91 63008 59482 • vishnuvar24@gmail.com • linkedin.com/in/vishnu-vardhan-25b71b266

PROFESSIONAL SUMMARY

Software Developer specializing in production AI agents and LLM-orchestrated workflow automation. I build scalable, event-driven backend systems with Node.js, TypeScript, and NestJS in a microservices architecture, bringing together multiple LLMs and third-party data APIs to ship intelligent, task-specific automation. I care about reliable, performant code and thoughtful system design.

WORK EXPERIENCE

Software Developer Jan 2026 – Present
Turgo.ai (Growstack Inc.) *Hyderabad, India*

- Develop and maintain autonomous AI agents and custom workflow nodes that power Turgo's marketing automation platform.
- Architect scalable backend services and REST APIs with Node.js, TypeScript, NestJS, and Express in a microservices architecture.
- Orchestrate multiple LLMs alongside third-party data APIs to deliver intelligent, task-specific automation.
- Engineer asynchronous, event-driven job processing with Redis, BullMQ, and Kafka for reliable, high-throughput task handling.
- Manage data persistence and analytics across MongoDB and ClickHouse, and containerize services with Docker.
- Debug and optimize complex workflows, collaborating closely with product and engineering teams to improve performance, reliability, and scalability.

KEY PROJECTS

AI Agents for Task-Specific Automation
Node.js · TypeScript · LLMs · BrightData · Apify · Serper · SERP API

- Designed and built multiple autonomous AI agents, each focused on a specific task such as profile scraping, profile analysis, and competitor research.
- Integrated BrightData, Apify, Serper, and SERP APIs directly within the agents to fetch, scrape, and enrich data.
- Orchestrated multiple LLMs inside the agent logic to process data and generate intelligent, task-specific outputs.

Workflow Automation Nodes & Integrations
Node.js · NestJS · OAuth 2.0 · REST APIs

- Built and integrated custom workflow nodes for social media posting, CRM operations, and LLM-powered tasks.
- Implemented OAuth 2.0 connection logic to securely authenticate and link third-party services.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++
Backend: Node.js, NestJS, Express, REST APIs, Microservices, OAuth 2.0 / JWT
AI & Automation: AI Agent Development, LLM Integration, Multi-LLM Orchestration, Workflow Node Design
APIs & Data: BrightData, Apify, Serper, SERP API, Webhooks, Third-Party Integrations
Messaging & Data: Redis, BullMQ, Kafka | MongoDB, ClickHouse, SQL
DevOps & Tools: Docker, Git, GitHub, Cloud Computing
Concepts: System Design, Scalability, Event-Driven Architecture, OOP, Problem-Solving

EDUCATION

B.Tech in Computer Engineering 2020 – 2024
PBR Visvodaya Institute of Technology & Science, Kavali *Percentage: 71.83%*
